Research Interests

As a pharmacy student, my research interests span multiple areas within the pharmaceutical sciences. In particular, I am driven to explore the potential of natural plant-based compounds and their therapeutic applications, while also investigating aspects of biopharmaceutics and adverse drug reactions.

Interests: Pharmacology, Phytopharmacology, Machine Learning, Computational Drug Discovery, Neurodegenerative Disease Research.

Research Experiences

Center for Health Innovation, Research, Action, and Learning (CHIRAL) - Bangladesh *Dhaka, Bangladesh*
Research Assistant *December 2024 - Present*
•

DeepBio Academy *Dhaka, Bangladesh*
Teaching Assistant *September 2026 - Present*
•

Department of Pharmacy, Islamic University *Kushtia, Bangladesh*
Undergraduate Researcher *October 2024 - Present*
•

Center for Health Innovation, Research, Action, and Learning (CHIRAL) - Bangladesh *Dhaka, Bangladesh*
Research Intern *May 2024 - December 2024*
•

Education and Training

Department of Pharmacy, Islamic University *Kushtia, Bangladesh*
Bachelor of Pharmacy (B.Pharm) *February 2023 - Present*
- Currently pursuing a Bachelor of Pharmacy degree with research interests spanning pharmacology, phytopharmacology, bioinformatics, machine learning, and computational drug discovery

Technical Skills

Programming Languages: Python, R ; **Data Science:** Machine Learning **Analytics Softwares:** SPSS, Microsoft Excel; **Survey Tools:** KoboToolBox, Google Forms; **Academic Writing Tools:** Microsoft Word, Mendeley; **Miscellaneous Skills:** RStudio, Jupyter, VSCode, Rmarkdown, Quarto, Version Control(Git), APIs
